

FOR PARENTS

# Kids and YouTube: 10 everyday problems, solved.

The worries parents tell us about, and how BattoTV fixes each one. Real screens from a family using BattoTV.

 [battotv.com](https://battotv.com)

# Sound familiar?

Each problem, and what changes with BattoTV.

One video leads to the next... and the next

Only the videos you choose

Endless Shorts and scrolling

Just the video, nothing else

"Just 5 more minutes!" every day

Limits kids can't skip

Screens at dinner, homework or bedtime

TV sleeps when you say so

No time to find good videos

BattoTV Picks, already on

Siblings of different ages

A profile for every kid

"What did they actually watch?"

Clear watch history

Too young to read or search

Big pictures, just tap

You're busy, kid's on the tablet

Control it from your phone

Kids learn to get around the rules

Grown-ups' lock and PIN

🙄 **THE PROBLEM**

**One video leads to the next... and the next.**

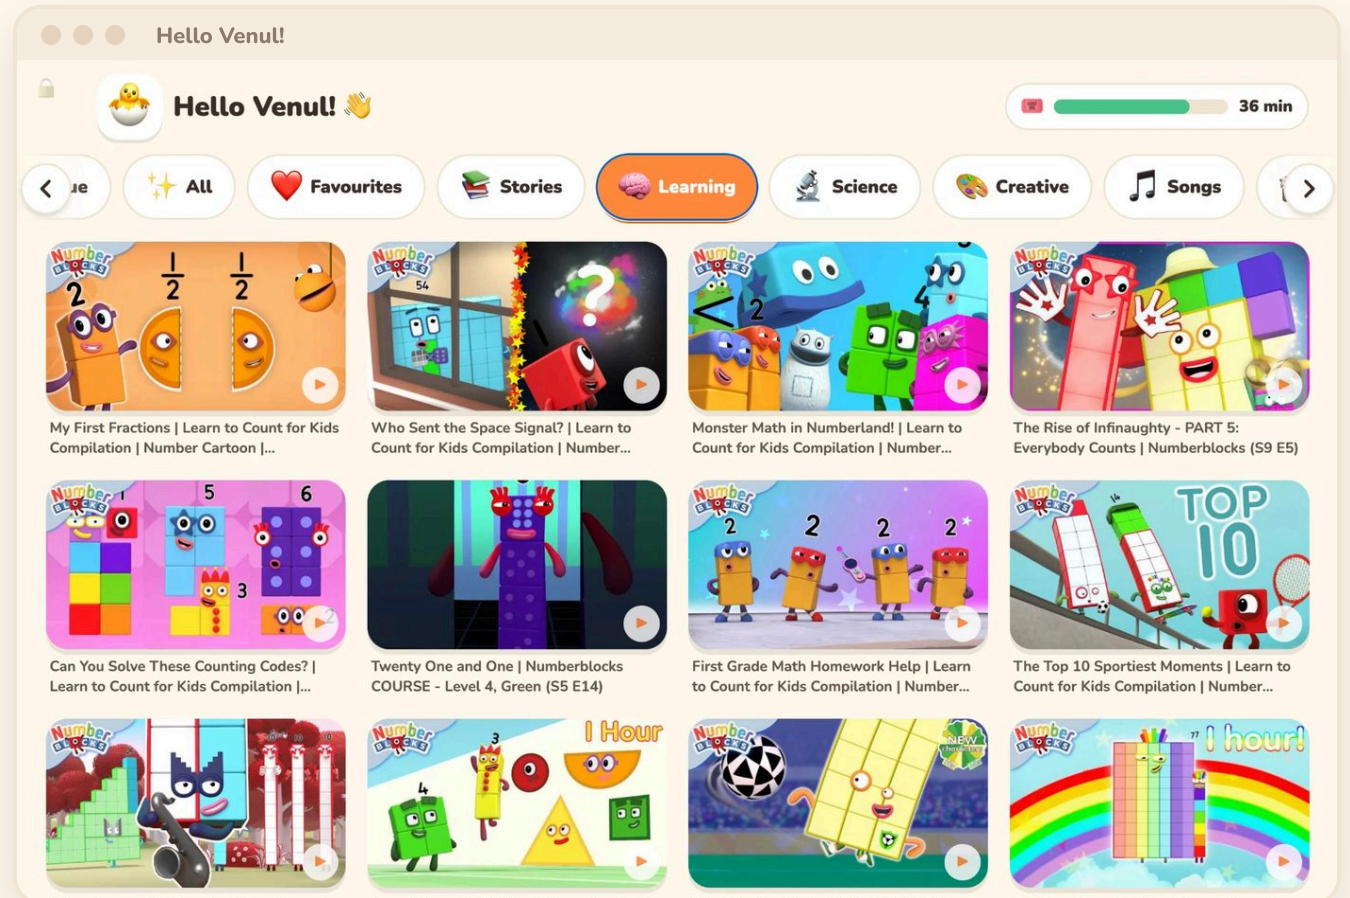

Autoplay and suggested videos can take kids far from where they started, to things you never picked.

✅ **WITH BATTOTV**

**Only the videos you choose**

Kids see **only** the videos, channels and playlists you add. No suggestions and no search box, so there's nowhere else to go.

 **THE PROBLEM****Endless Shorts and scrolling.**

Short clips, comments and "up next" lists are made to keep kids watching.

 **WITH BATTOTV****Just the video, nothing else**

No Shorts, no comments, no suggested videos, no links out to YouTube. Just the video and simple buttons. And a fresh **20 videos a day** in each list, so there's always something new without scrolling.

 **THE PROBLEM**

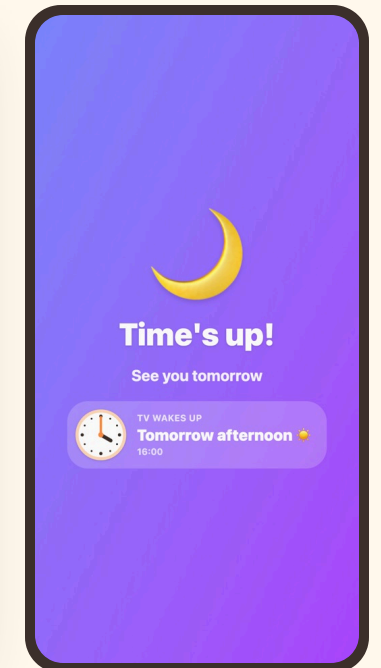

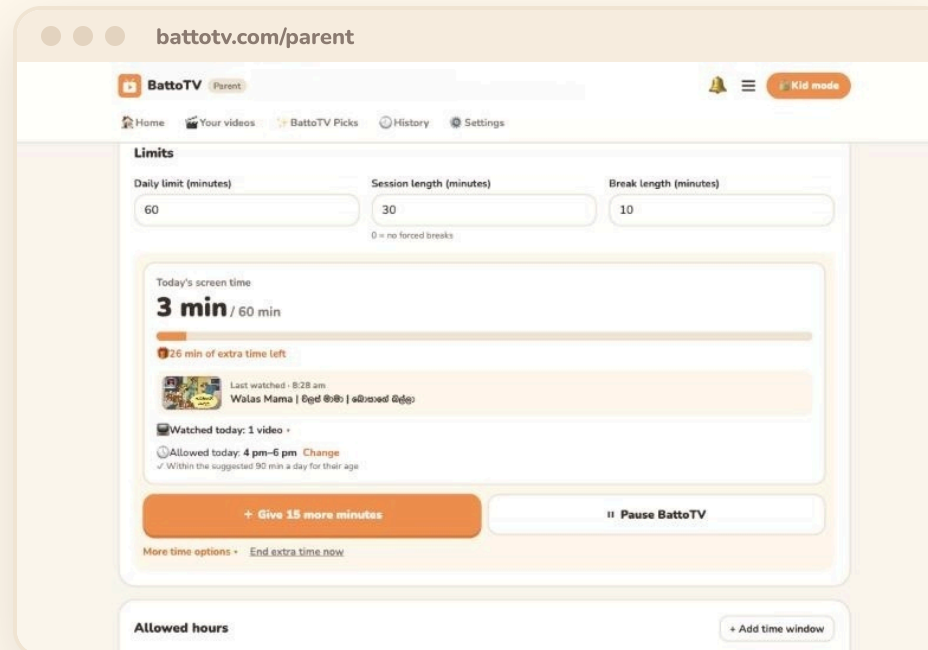

**"Just 5 more minutes!" Every. Single. Day.**

When screen time ends with a parent taking the tablet away, it often ends in tears.

 **WITH BATTOTV**

**Limits kids can't skip**

Set a **daily limit** and **short turns with breaks**. When time is up, BattoTV stops by itself with a calm, friendly screen, so you're not the bad guy.

 **THE PROBLEM**

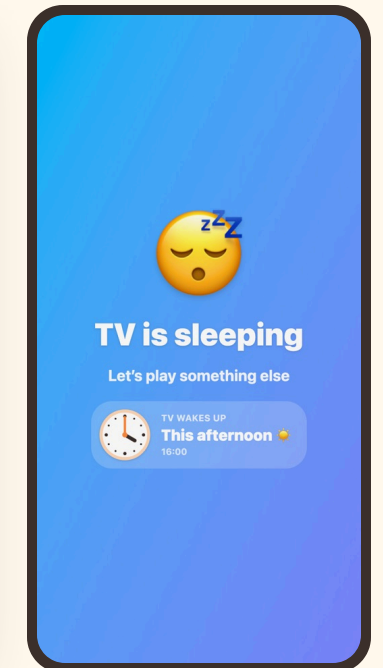

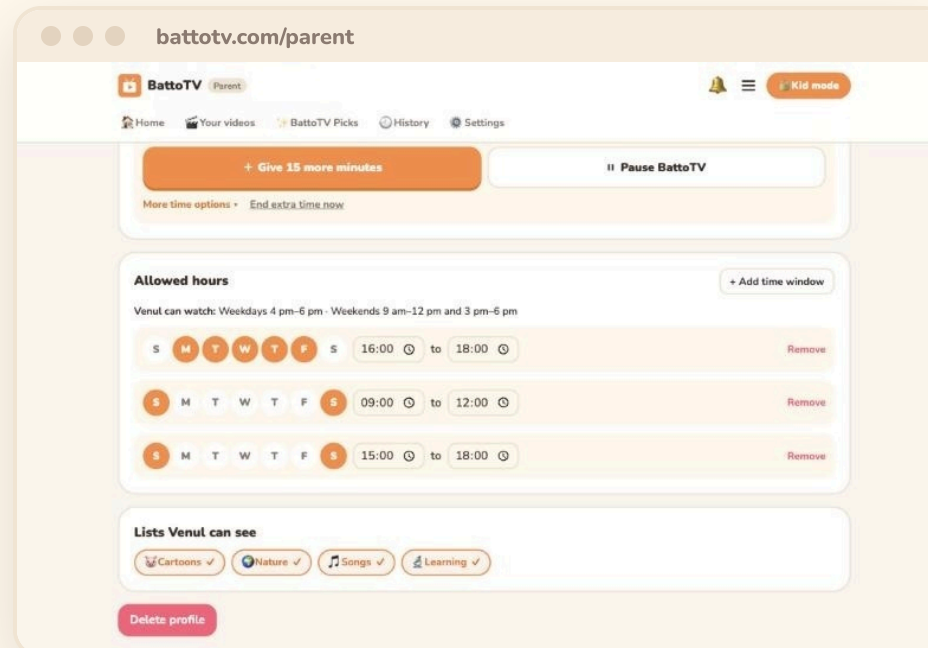

## Screens at dinner, homework or bedtime.

Kids pick up the tablet whenever it's around, even when it's time for something else.

 **WITH BATTOTV**

## TV sleeps when you say so

Choose the days and times, like **weekdays 4–6 pm**. Outside those hours, kids see "TV is sleeping" and when it wakes up again.

 **THE PROBLEM**

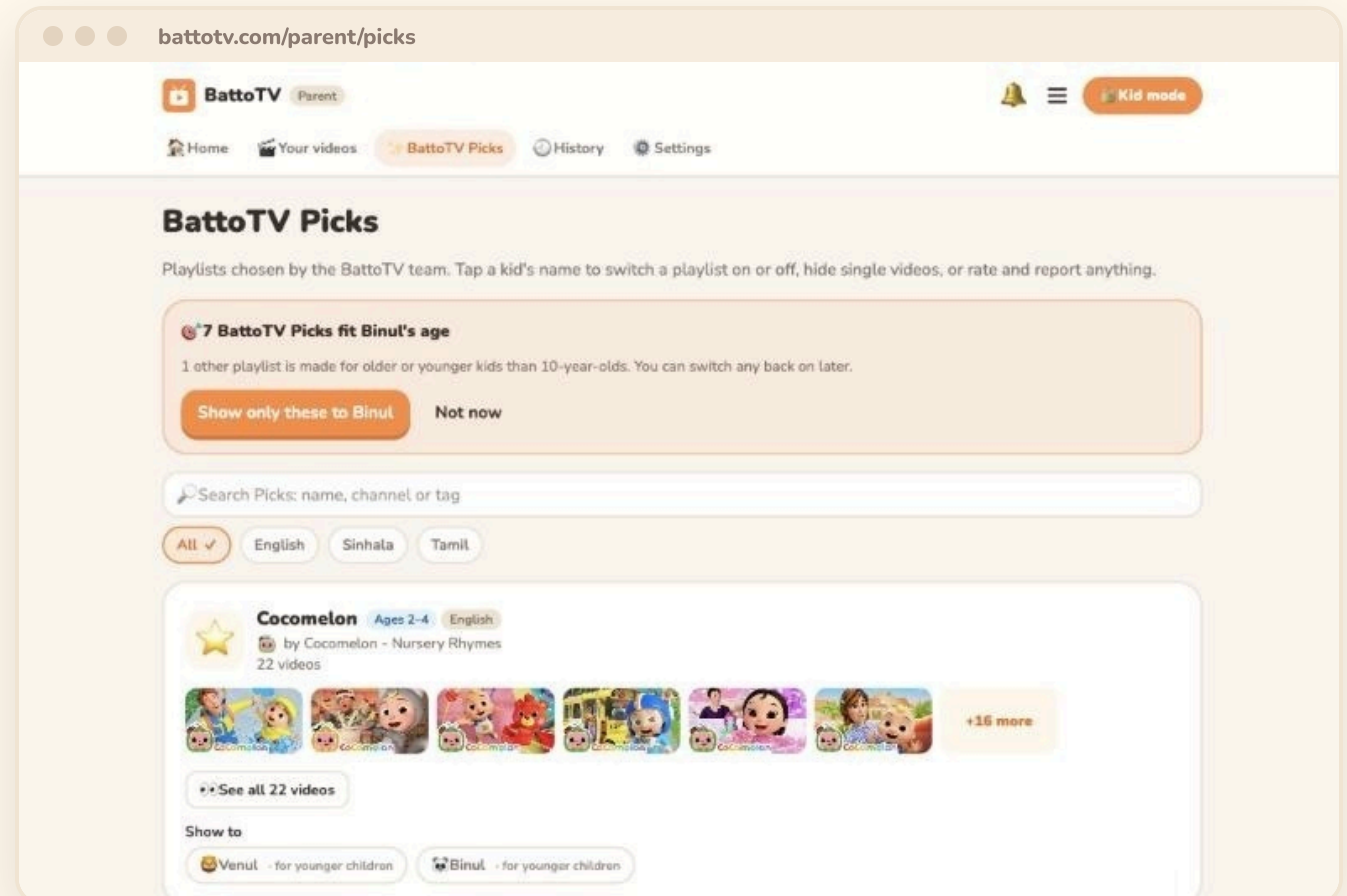

## No time to find good videos.

Checking every channel yourself takes hours you don't have.

 **WITH BATTOTV**

## BattoTV Picks, already on

Kids' playlists chosen by the BattoTV team switch on by themselves for your child's **age and language** (English, Sinhala, Tamil), in six categories: cartoons, songs, stories, learning, science and creative. A new category leads each day, Cartoons last.

 **THE PROBLEM****Siblings of different ages, one tablet.**

A 3-year-old and a 10-year-old shouldn't see the same videos or have the same limits.

 **WITH BATTOTV****A profile for every kid**

Each kid gets their own picture, age, languages, videos, daily limit and hours.

The screenshot shows the Battotv.com/parent interface. At the top, there's a navigation bar with the Battotv logo, a 'Parent' tab, a bell icon, a menu icon, and a 'Kid mode' button. Below the navigation bar, there are links for Home, Your videos, Battotv Picks, History, and Settings. The main content area is titled 'Venul' with a back arrow. It contains a form for setting up a child's profile. The form includes a 'Kid's name' field with 'Venul' entered. Below that is a 'Birthday (month & year)' section with dropdowns for 'Sep' and '2019'. A note says '7 years old - used to suggest Battotv Picks for their age.' The 'Languages' section has buttons for 'English' (checked), 'Sinhala' (checked), 'Tamil', and '+ Other'. A note says 'Pick one or more. We switch on Battotv Picks in these languages that fit their age.' The 'Avatar' section shows a row of 15 animal and object icons, with the first one (a cat) selected. Below the avatar section is a 'Subtitles (CC)' section with a toggle switch. The 'Limits' section is partially visible at the bottom, showing fields for 'Daily limit (minutes)', 'Session length (minutes)', and 'Break length (minutes)'.

🙄 **THE PROBLEM**

## "What did they actually watch today?"

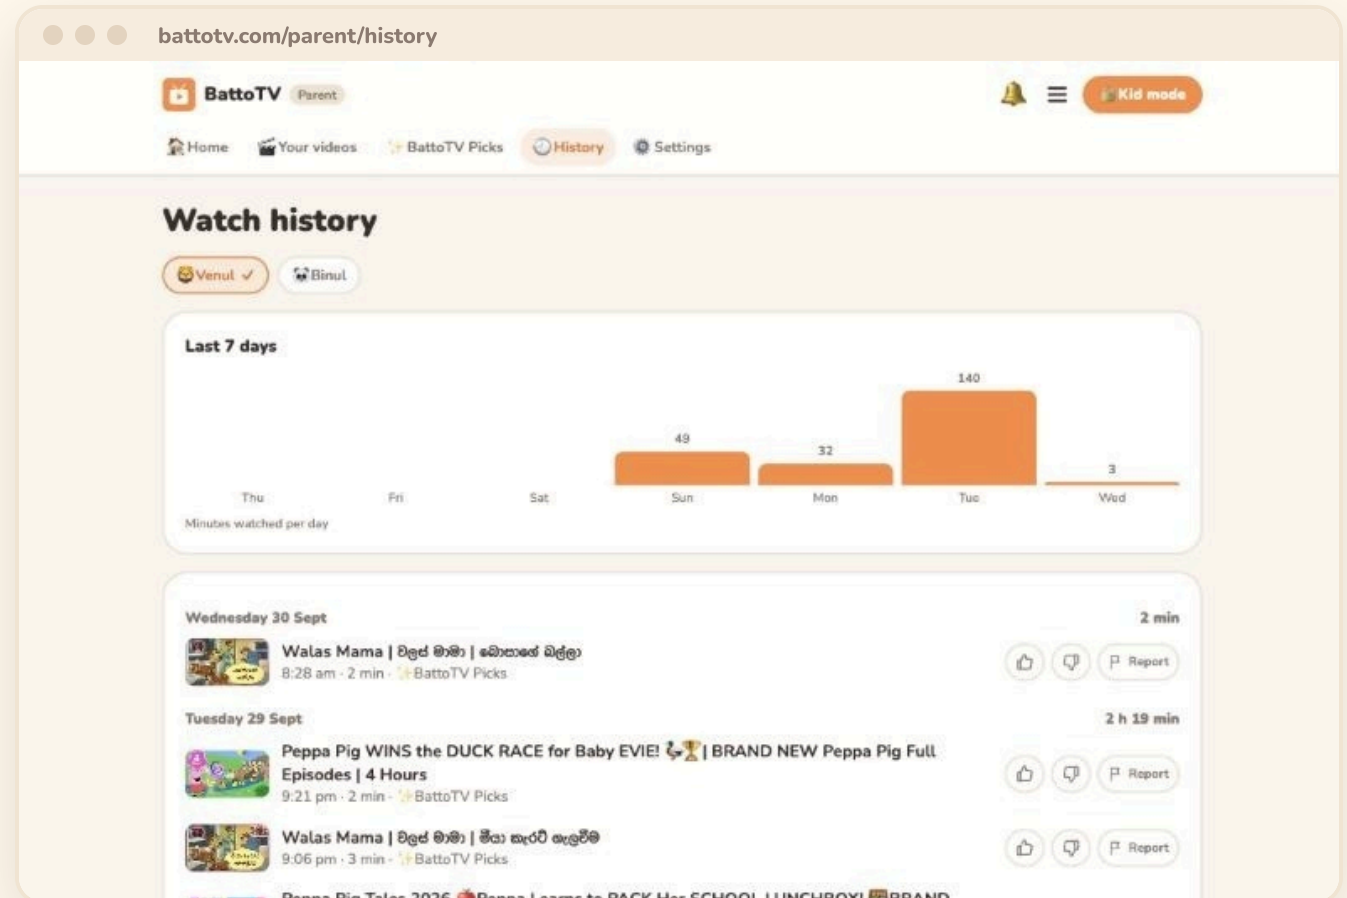

It's hard to know what kids watched, or for how long, once the screen is off.

✅ **WITH BATTOTV**

## Clear watch history

Minutes watched each day for the last 7 days, and every video with the time. Like, dislike or report any video straight from the list.

 **THE PROBLEM****Too young to read or search.**

Small kids tap the wrong thing, or need help every time they want a video.

 **WITH BATTOTV****Big pictures, just tap**

Kids tap their own picture, then a big video tile. No typing, no menus, no reading needed.

 **THE PROBLEM**

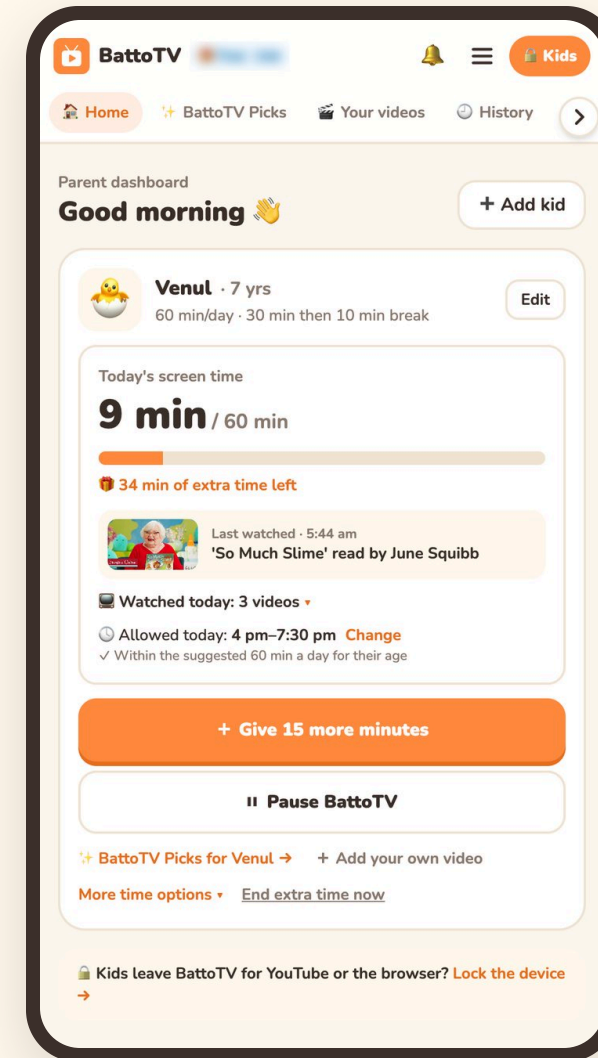

**You're busy, and your kid is on the tablet.**

Walking over to check the time or change a setting isn't always possible.

 **WITH BATTOTV**

**Control it from your phone**

See today's minutes and what's playing on the parent dashboard. **Give 15 more minutes** or **Pause BattoTV** from anywhere with one tap.

 **THE PROBLEM****Kids learn to get around the rules.**

Clever kids find the settings, switch profiles or turn the limits off.

 **WITH BATTOTV****Grown-ups' lock and PIN**

Settings are behind a 3-second hold on the  corner plus your PIN. A profile can ask a grown-up for the PIN before it opens.

# Try it free for 14 days

No card. Nothing renews by itself.

**Then BattoTV Family: up to 4 children, LKR 4,990 a year**

**Start free at [battotv.com](https://battotv.com) →**

That's about LKR 416 a month, paid once a year.
